RE: Delta Hospice Project – Millwork & Finish Carpentry

Dear Ted;

18 months ago, when Brad Johnson and I drove out to your shop to meet with you and tour your operations for the purpose of pre-qualifying your firm to bid the Delta Hospice Millwork, we had no idea you that would be the successful bidder. Nor did we foresee that we would be as happy with your work as we are today. I think I can speak for the entire Kindred Team when I say that we have had a great experience working with CWC on the Delta Hospice project. The accuracy and attention to detail in your shop drawings was outstanding and our site superintendent was pleased to find your field staff to be dedicated professionals, who take great pride in their workmanship. Your firm's ability to maintain high working standards, and your commitment to quality from the start to finish of the project greatly contributed to the project's overall success. Your team managed the shop well and delivered the product to the site as detailed on the shop drawings, on time and at the expected level of quality. The products were well managed from the shop all through transport to the site and installed with great attention to detail, ensuring an excellent finished product.

As the Project Manager for Delta Hospice, I can attest that it was a pleasure to work with your firm—we found your group to be dedicated professionals, solutions oriented, eager to help in anyway possible manner and committed to helping us successfully deliver a high quality product on time and under budget. Quality trades make the difference between success or failure and your firm certainly pulled their weight with respect to delivering for us. We are pleased to say we will put you on our preferred list of Millwork Trades and that we look forward to the opportunity to work with you again on other Kindred projects.

Congratulations on a job well done, and good luck with your submission to the 2010 AWMAC awards.

Sincerely,
Kindred Construction Ltd.

Shawn Ruthven, Senior Project Manager
